**Fig. 4** The output 1-dB compression point and IP<sub>3</sub> of WBA1730-40A

The output 1-dB compression point and IP<sub>3</sub> are shown in **Figure 4**. WBA1730-40A offers typical 16.0 dBm of P<sub>1dB</sub> and 26.0 dBm of IP<sub>3</sub>.

The standard miniature housing, WP-5 is employed for the WBA0510 series amplifiers. There are three (3) mounting through holes, with the diameter of 0.125", for installing the amplifier on a chaste. The housing is made of bare brass based material with gold plating, which serves as the DC and RF ground. The +5.0V DC power supply is fed through a feedthru as shown in **Figure 5**. No external component is required for the operation of the amplifiers. The input and output connectors are SMA female. A standard 8-inch/lb SMA wrench should be used to connect cables to the amplifiers. Failing to do so may result permanent damage of the connectors.
